

I am a licensed Amateur Radio Operator, KG6PDU. The Amateur Radio Service needs to use sensitive receivers and antennas, and BPL service will most likely cause harmful interference to Amateur Radio.

The FCC needs to guarantee that I can get relief when BPL causes interference to my station. Other than that if you cannot guarantee that the BPL will not cause harmful interference to the radios; then it would ruin the hobby for good. And the equipment I have and everybody else does would be useless. I strongly urge you to reconsider allowing the BPL to continue on. Thanks for taking the time to read this.
